

The International Helmholtz Research School of Biophysics and Soft Matter offers a **Guest Student Programme**

from 26 July to 2 October 2015.

You are a master's student in physics, chemistry, biology or a related subject and would like to work on a 10-week project together with one of our scientists?

Are you interested in gaining research experience in an interdisciplinary and international environment, exploring science where traditional disciplines overlap?

Would you like to learn more about...

- ... soft matter (colloids, polymers, membranes, complex fluids, flow dynamics, self-propelled particles, ...),
- ... biophysics (biomechanics, structural biology, cellular signalling pathways, bioelectronics, ...),
- ... or related methods (NMR, scattering techniques, computer simulations, spectroscopy, microscopy, ...)?

Then apply for our guest student programme in Jülich, Bonn, Cologne, and Düsseldorf!

Further information and admission guidelines:

www.ihrs-biosoft.de/gsp

Admission deadline: 31 March 2015
